

EDC Speaker Series

Goodnow Library, 21 Concord Road, Sudbury, MA 01776

05/20/08 (Tue) 07:00PM Energy Use and Your Buildings **Andrew Proulx and Tyke Crowley of EnergySavvy Inc.**

Learn how municipalities and private building operators and owners can reduce their energy cost and environmental impact. The presentation will cover basic energy use principles, a brief description of the importance of benchmarking, and be followed by a discussion of comprehensive energy audits through a case study. You will follow an energy audit starting with the building envelope assessment to the building operation and maintenance procedures. Summarized options for improving energy efficiency such as building air sealing, equipment upgrade or replacement, and energy-saving operation and maintenance policies will finish the presentation.

Andrew Proulx is a registered professional engineer and a co-founder of EnergySavvy Incorporated, a startup consulting company that partners with clients to offer strategic energy planning to maximize savings and protect against volatile energy prices.

06/17/08 (Tue) 07:00PM An Introduction to Building Sciences **Paul Eldrenkamp of BYGGMEISTER**

Leaks, Smells, and Peeling Paint... Why do houses with wet basements often also have mildew in the attic? Why has my brand new exterior paint already blistered? Why did my heating load increase after I replaced some of my windows? And more... Paul will also delve into what it takes to insulate your older home.
