

Information about enrolling  
in the

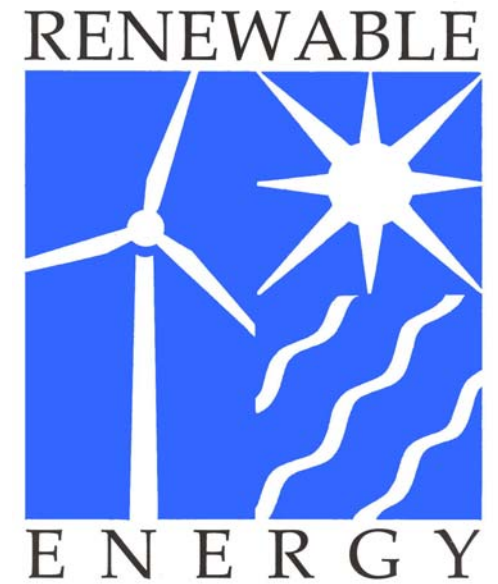

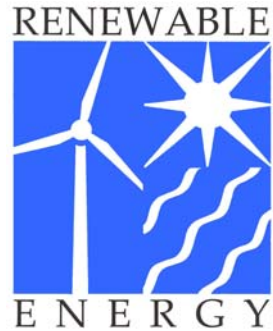

**NSTAR Green** program is  
available on NSTAR's website,

*www.NSTAR.com* or

by calling

1-800-592-2000.

Enroll now for  
**NSTAR GREEN**  
on NSTAR's website,  
*www.NSTAR.com*,  
or call  
1-800-592-2000.

*This pamphlet has been prepared by the  
Sudbury Earth Decade Committee (EDC).*

*EDC is committed to supporting the  
**NSTAR Green** program as a means to  
bring about a reduction in the use of fossil  
fuels and the resulting emission of carbon  
dioxide.*

*Thank you for signing up for **NSTAR  
Green** and doing your part to meet the  
challenge of global warming.*

*The Sudbury Earth Decade Committee is  
a non-profit organization committed to  
environmental causes. You can find out  
more about EDC at *www.sudburyedc.org*.*

**NSTAR  
GREEN IS  
HERE!**

All of NSTAR's residential and small business customers have the opportunity to have electricity supplied by wind power from Maple Ridge Wind Farm in upstate New York.

Electricity produced by wind power is a clean alternative to electricity produced from fossil fuels such as coal, oil, and natural gas. These fuels emit carbon dioxide, trapping the sun's heat in the atmosphere and causing a rise in global temperatures.

There are two options. To purchase all (100%) of their electricity from the wind farms, NSTAR customers will pay an additional \$.0136 per Kilowatt hour. To buy only half (50%) of their electricity

from renewable sources would cost an additional \$.00837 per Kilowatt hour. For example, for those who use 500 Kilowatt hours per month:

- To buy all their electricity from renewable energy, the program would cost \$6.80 per month extra.
- To buy half of their electricity from renewable energy would cost \$4.19 per month extra.

NSTAR customers who choose to participate in **NSTAR Green** may opt out of the program at any time. There is no long-term commitment.

By using renewable sources to produce electricity, you will help to reduce fossil

fuel usage, green-house gas emissions, and best of all, increase the sustainability of our electricity uses.

Each household or business that buys all of its electricity from **NSTAR Green** for a year will be reducing as much emissions as if it took a car off the road for the same timeframe (based on American averages of electricity and car usages).

By participating in this program, you will support the development of renewable energy in our region. The more people that sign up, the more demand for wind power, and the more renewable energy projects will be developed.
